PROFESSIONAL SUMMARY

Backend Software Engineer with 3+ years of experience developing scalable and high-performance web applications using Ruby on Rails, Golang, and PostgreSQL. Experienced in designing RESTful APIs, optimizing databases and caching, implementing background jobs, and integrating cloud-based services. Strong knowledge of system design, microservices concepts, Agile/Scrum practices, and Test-Driven Development (TDD). Adept at building secure, maintainable, and performance-driven backend systems.

EXPERIENCE

06/2022 – 08/2025
Kaushambi

Adware Technologies Pvt Ltd

Associate Software Engineer

- Technologies: Ruby on Rails, Golang, PostgreSQL, Redis, Sidekiq, RESTful APIs, Git, Agile/Scrum
- Developed scalable backend features and RESTful APIs for user management, job posting, and bidding workflows in a freelancing platform.
- Built and integrated Golang-based microservices for activity tracking and automated screenshot capture functionality.
- Implemented background jobs and recurring task automation using Sidekiq and Cron Jobs to improve system efficiency.
- Analyzed system requirements and delivered high-performance, maintainable, and scalable backend solutions.

EDUCATION

2014 – 2019
Bareilly, UP

B.Tech in Computer Science

MJP Rohilkhand, Bareilly

- GPA: 6.21/10

2013 – 2014
Bareilly, UP

Intermediate

Wood Row Sr. Sec. School, Bareilly

- Percentage: 61%

TECHNICAL SKILLS

Languages

Ruby, Golang, ReactJs, Python

Databases

PostgreSQL, MySQL

Tools

Git, Docker, Postman, GraphQL

Workflow

Agile, Scrum, Jira, Trello

Frameworks

Ruby on Rails, Gin

Frontend

HTML, CSS, jQuery, Javascript, HAML, Bootstrap

Others

REST APIs, gRPC, WebSockets, Firebase, JWT, Elasticsearch

Operating Systems

Linux (Ubuntu), Windows, MacOS

ACHIEVEMENTS

Employee of the Month

Adware Technologies

- Awarded for outstanding contributions to the tracker module and for work dedication.

PROJECTS

01/2025 – 08/2025

MonetizeAI (AI Agents Platform)

Client: MonetizeAI US

- Tech Stack: Ruby on Rails, MySQL, Stripe, Supabase, Google SMTP, Sharetribe, Open-Agent-Platform, RESTful APIs
- Developed the application from scratch, including backend architecture, Stripe payment integration, and scalable core platform features.
- Integrated Open-Agent-Platform, Supabase, and deployed AI agents while managing agent records and backend operations on the Rails server.

01/2025 – 03/2025

GoLang Microservices Exploration

Self-Learning Project

- Tech Stack: Golang, PostgreSQL, RESTful APIs, Goroutines, Channels, Postman
- Developed concurrent backend functionalities using Goroutines and Channels for efficient request processing and performance optimization.
- Built and tested RESTful APIs with PostgreSQL integration while exploring Go modules, structured error handling, and scalable API architecture.

04/2024 – 12/2024

Vistaweg Foundation (Donation Platform)

Client: Vistaweg Foundation

- Tech Stack: Ruby on Rails, MySQL, Stripe, Razorpay, Sharetribe, RESTful APIs
- Built the application from scratch with scalable backend architecture and business workflows.
- Integrated Stripe and Razorpay payments while designing optimized database schemas based on business requirements.

02/2023 – 04/2024

ProWurk (Freelancing Platform)

Client: Adware Technologies

- Tech Stack: Ruby on Rails, Golang, PostgreSQL, Redis, Sidekiq, Cron Jobs, Google SMTP, RESTful APIs
- Developed backend modules for user management, job posting, bid automation, and activity monitoring in a freelancing platform.
- Implemented workflow automation using Sidekiq, Cron Jobs, and RESTful APIs.
- Built and integrated a Golang microservice for screenshot capture and time tracking.

06/2022 – 02/2023

eCompim

Client: eCompim Team US

- Tech Stack: Ruby on Rails, GraphQL, Vue.js, PostgreSQL, Amazon SP-API, eBay APIs, RESTful APIs
- Developed scalable backend features for a Product Information Management (PIM) platform to manage and synchronize product data across multiple marketplaces.
- Built and optimized GraphQL APIs for efficient communication between Rails backend and Vue.js frontend.
- Integrated Amazon SP-API and eBay APIs to fetch, update, and manage product information across different eCommerce platforms.
